HISTORIC PRESERVATION COMMISSION MEETING MINUTES

CITY OF DAVENPORT, IOWA

TUESDAY, NOVEMBER 12, 2024; 5:00 PM

CITY HALL | 226 WEST 4TH STREET | COUNCIL CHAMBERS

I. Call to Order

Chairperson Hustedde called the meeting to order.

Present: McGivern, Hustedde, Gomez, Adams, Kretz

Absent: Eaton, Hoff

Staff Present: Berkley, Werderitch

II. Secretary's Report

1. Consideration of the October 8, 2024 meeting minutes.

Motion by Gomez, second by Kretz, to approve the October 8, 2024 meeting minutes.
Minutes were unanimously approved by voice vote (5-0).

III. Communications

IV. Old Business

1. Case DNRHP24-03: Request for demolition of 2202 West 4th Street. The First Bible Missionary Church is individually listed on the National Register of Historic Places. Adrian Jones, petitioner. [Ward 3]

Staff presented the history of The First Bible Missionary Church and the criteria for demolishing a structure within a National Historic District. The owner received an Official Notice and Order from the City to assess the structural integrity of the east wall. Exvorte Engineering provided a report determining the cause of the damage and recommendations for remedial action.

The Commission tabled this item at its October 8, 2024 meeting to provide the applicant additional time to obtain cost estimates for rehabilitating the structure and to identify potential funding options. Following the October meeting, the applicant contacted TNT Tuckpointing & Building Restoration, LLC for an estimate to repair the east sanctuary wall. The property owner received a quote of \$242,402 for the masonry work. Not included in the scope if the cost to replace the sanitary service lateral.

Staff recommended the Historic Preservation Commission approve demolition of the structure at 2202 West 4th Street.

Finding: The structure does not meet the criteria in Section 14.040.B of the Davenport Municipal Code.

Adrian Jones, petitioner, was in attendance to answer questions. He explained the findings of the engineers report and potential costs to rehabilitate the church. Adrian Jones stated the stained-glass windows would be donated to an event center in Georgia. He also intends to salvage and potentially donate the bell to the German American Heritage Center.

Commissioners discussed the criteria for listing the church as a local landmark. Unfortunately, due to a lack of community advocacy and financial capital, the Commission was understanding of the need for demolition. The Commission inquired about the possibility of preserving historic elements of the structure prior to demolition.

Motion by McGivern, second by Kretz, to approve Case DNRHP24-03 in accordance with the submitted materials. Motion to approve passed by a roll call vote (5-0).

V. New Business

1. Case COA24-19: Request for the removal of a rooftop skylight at 712 West 2nd Street. The Germania-Miller/Standard Hotel is a locally listed historic landmark. German American Heritage Center, petitioner. [Ward 3]

Staff provided a history of the property and overview of the request to remove the rooftop skylight due to deterioration and leaking. It is not original to the structure and was installed in the 1920s. The skylight is over an emergency access stairwell. The company that will remove the skylight will be covering the raised area with wood. Staff showed photos from throughout downtown detailing the limited visibility of the skylight on the structure.

Jerry Nieman, representative of the German American Heritage Center, was in attendance to explain the current condition of the skylight and rationale for removal.

Commissioners were supportive of the project given the limited visibility of the skylight.

Staff made a recommendation to approve the Certificate of Appropriateness to remove the rooftop skylight at 712 West 2nd Street in accordance with the submitted material.

The project was reviewed for conformance with the Standards for Review, Chapter 14.01.060C of the Davenport Municipal Code. The following standard is applicable to this project:

1. Every reasonable effort shall be made to make the minimal number of changes necessary to maintain a designated property in a good state of repair, thereby minimizing the impact of the proposed alteration.

Motion by Kretz, second by Adams, to approve Case COA24-19 in accordance with the submitted materials. Motion to approve passed by a roll call vote (5-0).

VI. Other Business

VII. Open Forum for Comment

VIII. Adjourn

Motion by McGivern, second by Gomez, to adjourn the meeting. Motion passed by a voice vote (5-0). The meeting adjourned at 5:32pm.

IX. Next Commission Meeting: December 10, 2024

Action / Date
12/10/2024

Subject:

Case COA24-20: Request for exterior alteration at 418 West 7th Street. The Paul and Mina Jannssen House is located within the Hamburg Local Landmark Historic District. Matthew Bevirt, petitioner. [Ward 3]

Recommendation:

A recommendation is made to approve the following project components outlined in the Certificate of Appropriateness at 418 West 7th Street in accordance with the submitted material:

1. Removal of the existing rear exterior staircase.
2. Installation of a first floor dining room window on the north elevation.

Staff cannot technically recommend approval of the replacement composite deck and sliding glass doors on the rear facade. However, the north elevation is not considered the primary facade of the structure. Since the south facade, abutting West 7th Street, has greater visibility within the historic district, the preservation of this elevation is a higher priority. Therefore, greater consideration is merited by the Commission.

The project was reviewed for conformance with the Standards for Review, Chapter 14.01.060 C of the Davenport Municipal Code. The replacement composite deck and rear sliding glass door do not meet the following standard:

1. New additions and related new construction shall not be discouraged when such improvements do not destroy historic material and such design is compatible with the size, massing, scale, color, materials and character of the property, neighborhood and district, if applicable.

Background:

The Paul and Mina Jannssen House is a classic 2-story Queen Anne residence constructed in 1902. The single-family home is considered a contributing structure within the Hamburg Historic District. Building materials consist of a stucco foundation, wood siding on the first floor, wood shingles on the second floor, and a combination of hip and gable roofs with asphalt shingles. Prominent architectural details include a full porch with round wood columns, bay windows, and gable roof sections.

The residence was originally constructed as a single-family dwelling, but was later converted into four apartment units in 1938. The home has since been converted back into a single residence.

Request:

1. Remove the exterior staircase on the north side of the home (facing the alley). Install a new 8' x 16' deck.
2. Remove first floor kitchen door and window. Replace with a new Marvin door.
3. Install first floor dining room window.

Project Review:

According to a permit on file with the Building Department, the existing exterior staircase in the rear of the home was constructed in 2003. This was a replacement staircase. Staff believe an exterior staircase was added when the residence was converted into four apartment units. Since there is no longer an apartment unit on the upper floor, this staircase is no longer required per building and fire code. The existing staircase holds no historical merit. Therefore, staff do not object to its removal.

Following the demolition of the existing staircase, the homeowner intends to construct a new 8' x 16' composite deck and staircase, extending from the first floor to ground level. While the design will have less of a vertical impact on the home's rear elevation, it will project further from the facade and into the rear yard. The proposed materials are composite deck boards and aluminum railings. While these are modern materials, the Commission has approved composite decking on other porches in the Hamburg District.

The applicant intends to remove and replace the rear door and window with a 12' wide by 7' tall Marvin sliding glass door. The replacement sliding glass doors will have a wood interior and fiberglass exterior. The owner's intent is to match the aesthetic with the front-facing living room windows by incorporating both Craftsman and Queen Anne features. However, images of the front living windows were not provided in the application. It is unclear the extent that the sliding glass doors replicate the front windows. The proportions of the trim will match the balance of the home's exterior. Staff generally do not discourage new additions. However, the design must be compatible with the size, massing, scale, color, materials, and character of the property. The combination of a large composite deck and modern sliding glass doors is inconsistent with the overall aesthetic of the 1902 home.

The final project component involves the installation of a dining room window on the north elevation. Photos of the interior framing indicate a 7' wide by 3' tall section where a window likely existed when the home was originally built in 1902. The replacement window will be constructed using wood materials for the jamb and sash. Based on this evidence, staff is supportive of this request.

The Historic Preservation Ordinance recommends new construction be compatible with the size, massing, scale, color, materials, and character of the property and district. The addition of the composite deck and sliding glass doors generally does not match the character of the residence and historic district. However, staff believe the front facade, facing West 7th Street, is the defining feature of the home. Therefore, the proposed alterations will have minimal impact on the characteristics of the district.

HISTORIC PRESERVATION COMMISSION

APPLICATION FOR CERTIFICATE OF APPROPRIATENESS

1. REMOVE EXTERIOR STAIRWAY; BUILD FIRST FLOOR 8' X 16' DECK – ALLEY FACING REAR NORTH SIDE OF PROPERTY
2. REMOVE FIRST FLOOR NON-ORIGINAL KITCHEN DOOR/WINDOW – REPLACE WITH NEW MARVIN HISTORICAL DOOR – ALLEY FACING REAR NORTH SIDE OF PROPERTY
3. RESTORE ORIGINAL FIRST FLOOR DINING ROOM LARGE WINDOW

1.REMOVE EXTERIOR STAIRWAY; BUILD 8' X 16' DECK

Remove entire existing exterior stairway structure and replace with an 8'x16' [Composite Deck](#) and single staircase from first floor to basement ground level (Decking -Fibron composite, Cottage color, decking is 5-1/4" wide) and Single Staircase with [Metal Railing](#) (Railing: Westbury Tuscan railing, aluminum construction, powder-coated in black. The existing structure covers a certain 105 square feet and the new structure, (deck and stairs) covers an area that is less than the existing structure. Railing height per code compliance and will wrap around west and north side stairs descending to east similar to existing exterior stairway. The current non original obtrusive exterior stairway structure measures over 105 SF. Overall structure H 22' x W 30'. First and Second Floor deck landings measure 3' x 2.5'.

East Exterior

North & West exterior

PHOTO REPRESENTS WHERE ORIGINAL DOOR AND WINDOW WOULD HAVE BEEN.

The original Back Porch and Back Door - Westside and West facing are no longer a porch or an exit.

**2. REMOVE FIRST FLOOR NON-ORIGINAL KITCHEN DOOR & WINDOW NORTH ALLEY FACING REAR
REPLACE WITH NEW MARVIN HISTORICAL DOOR**

Subject Rear

REAR ALLEY FACING NORTH SIDE OF PROPERTY

In addition to removing the current obtrusive non original EXTERIOR STAIRWAY structure and building an 8' x 16' deck, the homeowners seek to remove and replace the non-original first floor back door and non-original small window with a Marvin historical door. The door interior is wood, and exterior composed of a wood-look-alike fiberglass. The aesthetic of the rear north facing door will match the front facing south side living room window in size and composition including both Craftsman and Queen Anne features with clean lines that balance out the aesthetic of this historical home. The congruous lines of the trim will follow suit matching the east dining room windows on the same first floor level.

Dual pane glass in each door panel 144" W x 84" H

Exterior paint trim and framing to match existing exterior windows in size and historical aesthetic. The trim will be congruous with the same matching exterior outer white trim color scheme of brick red inner trim of existing windows/doors. Dual pane glass in door panels with interior wood – exterior wood look alike – fiberglass. <https://www.marvin.com/products/doors/sliding/elevate-sliding-french-door> Marvin's Historical doors and windows are not in and of themselves historic. But they are suitable for use on historic buildings and environments.

3.RESTORE ORIGINAL DINING ROOM LARGE WINDOW

Replace the missing dining room window on the north wall to fit existing rough-in framing that remains hidden within the wall. The original 1902 home had a large window 7'x3' on the north side of the dining room. This was common in homes of this period installing a large window above the furniture line in order that furniture could be used under the window e.g., a buffet. Dining Room Additional Window – Exterior Additional large dining room window jam and sash would be constructed of wood using translucent glass, leaded glass, or stained glass, yet to be determined and to be incorporated at a later date.

NORTH INTERIOR WALL DINING ROOM HIDDEN ORIGINAL EXISTING WINDOW ROUGH-IN FRAMING

Historic Preservation Ordinance

Section 14.01.060 Certificate of Appropriateness Review Process

C. Commission review process - Standards for review. In considering an application for a certificate of appropriateness, the commission shall be guided by the following general standards in addition to any other standards or guidelines established by ordinance for a local landmark or historic district. In all cases, these standards are to be applied in a reasonable manner, taking into full consideration the issue of economic feasibility and other technical considerations.

1. Every reasonable effort shall be made to make the minimal number of changes necessary to maintain a designated property in a good state of repair, thereby minimizing the impact of the proposed alteration; and
2. The removal, alteration or concealing of distinguishing exterior architectural features and historic material of a designated property should be avoided when possible; and
3. All designated property shall be recognized as a product and physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural architectural features shall be discouraged; and
4. Most properties change over time, and those changes that have acquired architectural and/or historical significance in their own right shall be recognized, respected and retained; and
5. Distinctive architectural features, construction techniques and/or examples of craftsmanship that characterize a designated property shall be treated with due consideration; and
6. Deteriorated architectural features should, where possible, be repaired rather than replaced. Where the severity of deterioration requires replacement, the new feature shall match the old in design, color, texture and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical or pictorial evidence; and
7. Activities that cause deterioration of a designated property and its architectural features shall be discouraged. In those cases where the damage would be irreversible, such as sand-blasting and wet blasting fire-hardened bricks, the activities shall be prohibited. If cleaning is to be done, the gentlest means possible shall be encouraged; and
8. Known significant archeological resources possibly affected by a proposed activity shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken; and
9. New additions and related new construction shall not be discouraged when such improvements do not destroy historic material and such design is compatible with the size, massing, scale, color, materials and character of the property, neighborhood and district, if applicable.

D. Design criteria to implement review standards. When the commission is considering an application for a certificate of appropriateness, it shall consider the following architectural design criteria, or elements of design as they relate to the standards for review prescribed in Section 14.01.040C.

1. Height. The height of any proposed addition, construction or reconstruction should be compatible with the designated property and the surrounding structures, if located within a designated historic district; and
2. Proportions. The proportions (width versus height relationship) between doors and windows should be compatible, if not replicated, with the architectural design and character of the designated property; and
3. Scale. A proposed alteration, construction, reconstruction or addition should not negatively impact the scale of the designated property or district; and
4. Materials. Historic or original architectural features, or replacement elements which in all ways replicated the original, should be repaired whenever possible; and
5. Relationship of building masses and spaces. The relationship of a structure within a designated historic district to the rear, side and front yards between it and surrounding structures should be compatible; and
6. Roof shape. The roof design and shape should remain consistent with its original configuration and character; and
7. Site improvements. Landscaping and other site improvements, including off-street parking, should have as minimal of an impact as possible to the designated property's original plan/layout and its visual character.
